

'Only do what our heart tells you'
- Princess Diana

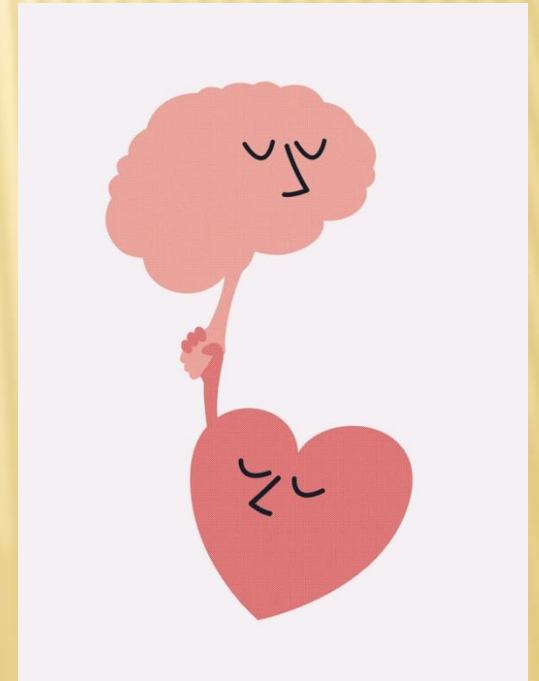

-
- *Today, we live in the world in which we must make very difficult decisions. People follow their hearts or minds.*

-
- *I absolutely agree with Princess Diana who said: 'Only do what our heart tells you'*

- *First, your heart is not only the most important organ. It is also the essence of your spiritual and emotional life. The heart is free and wild and is driven by love.*

-
- *We should do what we want to do, not what other people think we should do. It is good to listen to yourself and do not pay attention to others opinions.*

- *The decision to follow your heart is not easy, but in my opinion this is the best for us.*

-
- *Nowadays, people forget about basic feelings, emotions. For them is more comfortable to live without dreams and pretend that they are happy.*

- *Look at the children. They always follow what their heart say. They have many dreams and they are sincere.*

-
- *Thank you for attention*
